

**Model ATH6G8
Antenna
6GHz–8GHz**

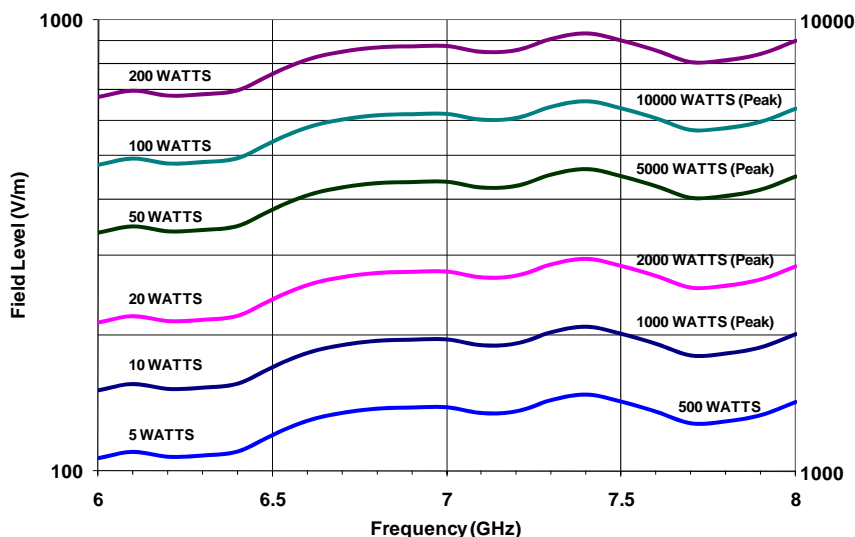

The Model ATH6G8 is a high gain, high power microwave horn antenna. With a minimum gain of 18dB over isotropic, the Model ATH6G8 supplies the high intensity fields necessary for DO160 HIRF testing. The Model ATH6G8 is compact and light weight for ready mobility, yet is built tough enough for the extra demands of outdoor use and easily mounts on a tripod or mounting plate. Part of a family of microwave horn antennas, the Model ATH6G8 provides the 6-8GHz response required for DO160 test specifications.

The ATH6G8 is ideally suited for use with the AR Model 3000TP5G8 and amplifiers in this frequency range.
