Tenney Strat - Altitude Simulation

Tenney Strat Altitude Chambers

Tenney's Tenneystrat Altitude Chambers simulate altitudes up to 200,000 feet. With an overall temperature range of -70°C to $+177^{\circ}\text{C}$, humidity capabilities of 20% to 98% RH, and workspace sizes ranging from 5 to 64 cubic feet, this highly developed line of altitude chambers offers one of the broadest selections in the industry.

We are confident that our solid altitude chamber construction and precise operating systems will provide the exacting performance and a high degree of reliability for your altitude testing needs.

► Features

- Continuously welded, stainless steel, vapor-tight interior liners
- Control tolerance is $\pm 0.3^{\circ}\text{C}$ and $\pm 2\%$ RH typical after stabilization
- Linear pressure transducer to measure altitude
- Non-corroding humidity system
- Low-water protection on humidity system
- Vertical-down recirculating conditioning stream

- Humidity capability: 20% to 98% RH in the temperature range of +20°C to +85°C as limited by a 3 degree dew point.
- Humidity not achieved simultaneously with altitude.
- Add suffix "R" to model number for humidity.
- Vacuum performance: All chambers achieve altitude up to 100,000 feet (8.2 mm Hg) in 35 minutes. Optional features extend altitude capabilities to 200,000 feet (0.17 mm Hg).
- Combined temperature and altitude to 60,000 feet maximum.
- Test data based on a 24°C ambient, sea level, 60 Hz. Performance slightly reduced on 50 Hz. Power requirements based on standard vacuum pump.
