BCP-514
Broadband Current Probe
10 KHz – 100 MHz

This current probe measures high power pulse currents such as those associated with EMP wave shapes. It clamps around large conductors or bundles of wire and has an aperture of 2.7”.

Frequency Range: 10 KHz - 100 MHz
Transfer Impedance (dBΩ) -18 to 0
Max Cont. Current (Amps) 350
Connector: N-Type, Female

Physical Dimensions
Aperture: 2.7” (70 mm)
Diameter: 5.0” (125 mm)
Weight: 2.5 lb.’s (1.13 kg)

Features
• High current conducted emissions measurements without saturation.
• Ideally suited to measuring currents on large cables.
• Individually Calibrated (Transfer Impedance calibration included)
• Split Type Clamp-on Design
• Three Year Warranty

The BCP-514 measures high power pulse currents such as those associated with EMP wave shapes. This current probe is designed to clamp around large conductors or bundles of wire with an aperture of 2.7” (70 mm).

Recommended Accessories
• CPF-530 Current Probe Fixture
• SAC-213 N/N Cable, 3 Meter
Broadband Current Probe
Transfer Impedance
Model: DCP-514

Transfer Impedance Conversion Formula:
\[ \text{dB}_\mu \text{A} = \text{dB}_\mu \text{V} - \text{dB} \Omega + \text{cable loss} \]
