The Model 2500A225 is a self-contained, broadband, completely solid-state amplifier designed for applications where instantaneous bandwidth and high gain are required. The amplifier is air cooled using internal self-contained liquid cooling for high performance and reliability. Push-pull LDMOS circuitry is utilized in all high power stages in the interest of low distortion and improved stability.

The Model 2500A225 is equipped with a Digital Control Panel (DCP), providing local and remote control of the amplifier. The DCP uses a 3 ¾ inch diagonal graphic display, menu assigned softkeys, a single rotary knob, and four dedicated switches to offer extensive control and status reporting. The display provides operational presentation of Forward Power and Reflected Power plus control status and reports of internal amplifier status.

All amplifier control functions and status indications are available remotely in GPIB/IEEE-488 format, RS-232 hard wire, fiber optic and USB. The bus interface connectors are located on the back panel and positive control of local or remote operation is assured by a keylock on the front panel of the amplifier.

High efficiency universal input, power factor corrected switching power supplies provide DC to all internal sub-assemblies. Housed in a stylish, contemporary enclosure, the Model 2500A225 provides readily available RF power for typical applications such as RF susceptibility testing, antenna and component testing, watt meter calibration, particle accelerators, plasma generation, communications and use as a driver for higher power amplifiers.

The export classification for this equipment is EAR99. These commodities, technology or software are controlled for export in accordance with the U.S. Export Administration Regulations. Diversion contrary to U.S. law is prohibited.
SPECIFICATIONS, MODEL 2500A225

RATED OUTPUT POWER ............................................... 2500W, 10 kHz–100 MHz
                                                          2500–1900W, 100 MHz–225 MHz (derating slope of 4.8W/MHz)

INPUT FOR RATED OUTPUT ......................................... 1.0 mW Max

POWER OUTPUT FOR 1dB COMPRESSION ................... 2000W, 10 kHz–100 MHz
                                                          2000–1200W, 100 MHz–225 MHz (derating slope of 6.4W/MHz)

FREQUENCY RESPONSE ............................................... 10 Khz-225 MHz instantaneously

GAIN (at max. setting) ............................................... 64 dB min.

FLATNESS ..................................................................... ± 3.0 dB max
                                                          ± 1.0 dB with int. leveling

GAIN ADJUSTMENT (continuous range) ......................... 20 dB minimum

INPUT IMPEDANCE ....................................................... 50 ohms, VSWR 1.5:1 max

OUTPUT IMPEDANCE ................................................... 50 ohms nominal

MISMATCH TOLERANCE ............................................... 100% rated power without foldback up to 6.0:1 mismatch, above which may
                                                          limit to 1250w reflected power

MODULATION CAPABILITY ........................................... Will faithfully reproduce AM, FM, or Pulse Modulation appearing on the input
                                                          signal.

HARMONIC DISTORTION ............................................. Minus 20 dBc maximum at 1800W

RF POWER DISPLAY ...................................................... 0–3000W full scale

RISE TIME/FALL TIME ..................................................... 10 nanoseconds maximum

PRIMARY POWER (User must specify) .............................. 187-264 VAC Delta (4-wire)
                                                          365-528 VAC, Wye (5-wire)
                                                          47-63Hz, 3-phase
                                                          10,000W maximum

CONNECTORS
RF Input ................................................................. See Model Configurations
RF Output .............................................................. See Model Configurations
Forward Sample...................................................... BNC Female on front panel
Reverse Sample...................................................... BNC Female on front panel
Remote Control....................................................... 24-pin Female GPIB/IEEE-488, 9-pin RS-232 and USB on rear panel
Remote Control (fiber optic) .................................... ST Connector, Tx and Rx RS-232
Safety interlock....................................................... 15 pin female Type D on rear panel

IEEE-488 (GPIB) & RS-232 INTERFACE ........................... Allows control of all amplifier functions and monitoring of all status indications
                                                          via standard GPIB/IEEE-488 or RS-232 commands

COOLING .................................................................... Forced air, internal self-contained liquid

WEIGHT (max.) ............................................................. 159 kg (350 lb)

SIZE (W x H x D).......................................................... 56.1 x 109.2 x 88.9 cm (22.1 x 43.0 x 35.0 in)
