The Model Series xx/xxS1G11 are portable, self-contained, air-cooled, dual-band, broadband, completely solid-state amplifiers designed for applications where instantaneous bandwidth, high gain and linearity are required.

The models are equipped with a Digital Control Panel (DCP) which provides both local and remote control of the amplifier. The digital display on the front panel indicates control status and reports of internal amplifier status. All amplifier control functions and status indications are available remotely in GPIB/IEEE-488 format, RS-232 hardwire and fiber optic, USB, and Ethernet.

These models are designed to have low spurious signals, linearity and are extremely load tolerant which enables them to be used in many RF applications such as: RF susceptibility testing, antenna/component testing, and communication technology testing. They can be used as test instruments covering multiple frequency bands and are suitable for a variety of communication technologies such as CDMA, W-CDMA, TDMA, GSM, UWB, WiMAX etc.

These models have the ability to be upgraded at a later date to the highest power levels listed in the model configurations.

SPECIFICATIONS COMMON TO ALL MODELS IN THE SERIES

INPUT FOR RATED OUTPUT ........................................ 1.0 milliwatt maximum, 0 dBm

INPUT IMPEDANCE .................................................. 50 ohms, VSWR 2.5:1 maximum

OUTPUT IMPEDANCE ............................................... 50 ohms, nominal

MISMATCH TOLERANCE * ........................................ 100% of rated power without foldback. Will operate without damage or oscillation with any magnitude and phase of source and load impedance.

*See Application Note #27.

MODULATION CAPABILITY ...................................... Will faithfully reproduce AM, FM, or pulse modulation appearing on the input signal

SPURIOUS ......................................................... Minus 73 dBc typical

CONNECTORS
RF INPUT ........................................................ TYPE N (front panel)
RF OUTPUT ........................................................ TYPE N (front panel)
M1 version (2) RF OUTPUT (1 for each band) .......... TYPE N (front panel)

REMOTE INTERFACES
IEEE-488 ........................................................ 24 pin female
RS-232 ............................................................ 9 pin subminiature D (female)
RS-232 (Fiber-optic) ........................................ Type ST
USB 2.0 .......................................................... Type B
Ethernet ......................................................... RJ-45

SAFETY INTERLOCK .............................................. 15 pin subminiature D

COOLING ........................................................... Forced air (self-contained fans)

SIZE (WxHxD) ..................................................... 50.3x34.3x61cm (19.8x13.5x24in) Cabinet
48.3x31.1x61cm (19x12.25x24in)
