Tenney’s ZKG Vacuum Oven provides a reliable oven for drying materials that require a vacuum to be applied during the drying process. Applications for these ovens include the drying of electronics and chips, plastics and pharmaceuticals.

The ovens are efficient and incorporate important safety features and offer condensation free drying in a homogenous vacuum environment.

General Specifications
- Stainless steel interior with painted, cold-rolled steel pressure vessel
- Galvanized steel exterior with powder coating
- Electric Plate Heating, located inside pressure vessel
- Double rotary vane vacuum pumps to ensure high vacuum
- High or low temperature drying, with and without vacuum
- Large insulated, tempered glass window

Not designed for volatile, explosive, or battery applications. Please consult factory for these applications.
